EDUCATION

Bachelor of Science in Computer Science

The University of Texas at El Paso (UTEP)

Awards: Fall 2023 – Fall 2025 Engineering Dean's List, Engineering Honors Program Alumni, NSF S-STEM 2025 Scholar

Relevant Coursework: Advanced Object-Oriented Programming, Data Structures, Discrete Structures, Calculus II

Anticipated: Dec 2026

Overall GPA: 3.72/4.00

SKILLS & CERTIFICATIONS

- **Proficient in:** Java, Python, Visual Studio,
- **Knowledgeable in:** SQL, HTML, CSS, JavaScript, GitHub
- **Basic Knowledge in:** C, TypeScript, Jupyter Notebooks, Linux Operating Systems

IBM – Tools for Data Science

Aug 2025 – Sept 2025

- Gained knowledge of core data science concepts (Big Data, Data Mining, Deep Learning) strengthening analytical skills
- Gained hands-on experience with key data science tools, including Jupyter Notebooks, R-Studio & GitHub utilized for developing proficiency in data-driven workflows & collaborations

PROJECTS

TicketMiner System – Full-Stack Object Programming Oriented System

Aug 2025 – Nov 2025

- **Developed a scalable Java-based** ticketing platform with a menu-driven console UI, **supporting 100+ customers and admin workflows**, automated ticket purchases, invoicing, and persistent CSV-based data storage, **reducing manual processing time by ~60% through automation**
- **Applied advanced OOP principles & design patterns (Factory Method, Abstract Factory, MVC)** to design extensible event & venue pipelines, **improving code reusability & system scalability by ~40%**

Solar Energy Predictive Modeling - GMIS Data Analytics Competition

Oct 2025 – Oct 2025

- Programmed a **Python-based solution as part of a collaborative team of 3** to predict solar panel DC output using weather data sets, **applying linear regression modeling with pandas and scikit-learn, reducing prediction time by 20%**
- **Standardized and preprocessed large CSV datasets with StandardScaler**, enhancing model accuracy and robustness for real-world energy data

Personal Website Portfolio

May 2025 – Jul 2025

- Built a responsive personal portfolio website using **HTML, CSS, & JavaScript**, optimizing performance to **decrease load time by 35% & responsiveness by 50%**
- Implemented a custom **JavaScript MP3 player** with audio controls (play, pause, skip, volume, seek) & a **responsive CSS** interface featuring animations

WORK EXPERIENCE

Technician - College of Engineering Dean's Office Undergrad Assistant II

Aug 2025 – Current

- Provided technical support for faculty, staff & students by **troubleshooting hardware/software** issues & configuring systems, **reducing resolution time by 30%**
- **Managed SQL-based databases** tracking equipment, software licenses & service requests, **increasing accuracy & retrieval efficiency by 40%**

Technician & Webmaster - Department of Computer Science Undergrad Assistant I

Jan 2024 – May 2025

- Solved **50+ monthly technical requests**, **reducing resolution time by 30%** & improving overall satisfaction of staff & students
- **Redesigned & optimized** departmental websites using **Cascade CMS, HTML & CSS**, improving site usability & **reducing navigation issues by 40%**

Production Assistant Internship - ABC 7, KVIA News – El Paso Texas Department

Aug 2024 – Dec 2024

- **Curated, edited, & published daily website stories**, including **HTML/CSS updates & layout changes**, while ensuring adherence to editorial standards
- **Collaborated with a team of 8 engineers** for live broadcasts, **reducing audio issues by 20% of 10+ broadcasts**

LEADERSHIP EXPERIENCE

Webmaster Chair – Webb-App Development Club

Mar 2025 – Current

- Spearheading the design & development of the club's new website using **Cascade CMS, HTML, CSS & JavaScript**, **improving user experience & navigation efficiency by 40%**
- Collaborating with club officers to restructure site content, **resulting in a 30% increase in user engagement & better alignment with organizational branding & goals**
